

INTRODUCING THE: FARMBASE STOCK AHEAD SIGN

Being in the farming industry we realised how much of a need there is for a sturdy yet lightweight, highly visible Stock Ahead sign.

The inspiration came from travelling around rural NSW. We noticed that the majority of Stock Ahead signs on the road weren't visible. If you did manage to see them, your vehicle would experience an extreme brake test!

Old, tattered signs are often left out with no stock on the road. This creates a "the boy who cried wolf" situation, motorists end up not paying much attention as they should when they see Stock Ahead signs.

Our FarmBase Stock Ahead Sign has been powder-coated bright green, so it doesn't blend into the colour of the road.

Our Class 1 Sign is highly reflective, paired with a magnetic, rechargeable LED Class 1 Beacon with 7 flash patterns, making it impossible for Motorists to not notice this sign.

The beacon is stored in a lockable anti-theft box; with the padlock included. The frame is lightweight making it easier to carry. It folds down flat to be transported on the back of a Ute with no problem.

The sign has been designed to allow a slight swing making it wind resistant. It meets all Australian Standard Requirements and is Australian made.

The value of this sign is very affordable in comparison to keeping your stock safe on the road.

- **Lightweight** but sturdy frame.
- Powder-coated **bright green** frame.
- Rust-resistant/**weather resistant**.
- **High-quality** Class 1 reflective sign.
- **Sign swings**, won't be knocked over by the wind.
